

CMU-CMU FAIMER REGIONAL INSTITUTE

2014 Fellows Brief Bio-data

Li Zhao

I come from Shenyang, the capital of Liaoning Province. I graduated from the department of clinical medicine, China Medical University in 2004. After that, I received my Bachelor degree of Neurology from Capital Medical University in 2007 in Beijing. During the 8 years school time, I have learned a lot both academically and spiritually. In the past years, I've worked in Shenyang health bureau as a Civil servant.

For my personality, I am open-minded, quick in thought, industrious and easy-going. I am interested in computers, sports and music. In my spare time, I like reading books, especially those about childcare. I love my 4-year-old son and I am eager to learn how to educate him in the right way.

There are several reasons for my application to the FAIMER fellow. First of all, I had been deeply impressed by the academic atmosphere, high quality in research ability of FAIMER. In my opinion, as one of the top organizations worldwide, FAIMER provides fellows with enough room to get further enrichment. Second, in my work, I found the knowledge of social medicine and the skills in health care administration are very important in making public health policy as well as dealing with daily administrative affairs. I'm eager to cognize more about this field. I am longing to do research in this specialty throughout my life, choosing it as my life-long career and devoting all my life to it. I think this is the most important factor for me to make this decision. Third, just as an old saying goes: it is never too late to learn. For people who want to adopt a healthy and meaningful life, it is important to find time to learn certain new knowledge. There is little evidence that education can be obtained at any age and at any place. I always believe that one will easily lag behind unless she keeps on learning.

Rui Gao

I am Gao Rui, was born on Mar. 09, 1980. I am married since 2005, now having a 5-year-old girl. I like music, cooking, shopping, and watching movies, etc. I have been working as an Associate Professor in the department of Nuclear Medicine, First Affiliated Hospital of Medical College of Xian Jiaotong University since July, 2005. I completed my MS of Neurology in June, 2005 and got my doctor's degree of Radiology in March, 2013.

I feel interested to take formal training on 'Medical Education', and I have a keen interest in Medical Education and have been reading and updating myself regarding the global trends and changes occurring in this interesting field.

CMU-CMU FAIMER REGIONAL INSTITUTE

2014 Fellows Brief Bio-data

Lei Tian

My name is Tian Lei. I am 29 years old. I was born in Shenzhen city, south China. And now I am living in Shenyang city, which locates in the northeast China. I just graduate from China medical university for my master degree in this summer. My major is health service administration and social medicine, and my research topic is medical education.

In 2011, I was very lucky to have the opportunity to study in research center for medical education of China medical university. And from then on, I started to do the study of physicians' competency framework. I am very proud that in 2013, I was a volunteer to do the service for CMB-CMU-FAIMER, and in 2014, I am going to join the study journey. Although I have little teaching or managing experiences currently, I am always happy to meet the new challenge.

I like reading and traveling in my spare time. Knowledge of history, sociology is always attractive to me. I also like to read literature. I have some interests in learning astrology. In my opinion, learning is enjoyable.

Xiaoqin Zong

My name is Zong Xiaoqin from Office of Academic Affairs of Chongqing Medical University (CQMU) and I'm engaged in teaching quality monitoring. I've been working here since 1998 when I graduated from Department of Preventive Medicine of CQMU. In 2007, I started to pursue my master degree of Medical Education and Management in China Medical University.

I feel incredibly lucky to have the chance of studying in FAIMER program. I sincerely anticipate that during this period I could complete my project together with the assistant of friends as well as improve myself remarkably.

Our university has implemented an experimental class for teaching innovation. Unlike the tradition classes, the curriculum is based on "organ-system" teaching model in the whole period. Hopefully I could find an optimal approach for evaluating or promoting this teaching model while learning in FAIMER.

Anyway, I truly believe this is going to be an enjoyable and fruitful study tour!

2014 Fellows Brief Bio-data

Sipin Tan

I am Dr Sipin Tan who was born on Jan 24th, 1974. Now I am an associate professor in Department of Pathophysiology, also I am the associate director of the experimental center of cell and molecular biology, Xianya School of Medicine, Central South University, Hunan Province, China.

I got my degree of Bachelor of Medicine in July 1996. I got my master degree of medical genetics in July, 1999. In year 2002, funded by the KC Wang Scholarship, I was recruited by King's College, University of London, UK to start my Ph.D training. In September, 2007, I returned to China after I got my Ph.D degree of Molecular Medicine and Genetics. Carrying on my job as a teacher in Department Of Pathophysiology, I was elected as the associate director of the experimental center of cell and molecular biology in Xianya School of Medicine, Central South University.

My husband is an architecture engineer, and we have been married for 11 years. My son was born in year 2008, and he will start his school life this year.

I enjoy reading and various types of physical activities such as playing Ping Pong and jogging.

Xiaoyuan Xu

Xiaoyuan XU was born on April 25, 1974 in Yancheng, Jiangsu Province. Currently serves as director of Academic Affairs Office of China Pharmaceutical University, she is also acting as general secretary of Ministry of Education's Steering Committee for Pharmaceutical Education, and China Pharmaceutical Education Association.

She was conferred with a bachelor degree in pharmaceutical analysis from China Pharmaceutical University, a master degree in higher education from Nanjing University and a doctoral degree in pharmacy administration from China Pharmaceutical University.

She has been engaged in a series of key projects conducted by Ministry of Education, such as "Study on Talents Training Mode of Higher Pharmaceutical Education towards 21st Century" and "Study and Practice of Talents Training Mode of Higher Pharmaceutical Education in the early 21st Century" and she was also in charge of one of the most significant research projects for the reform of Jiangsu higher education and teaching, "Accreditation Schemes for China Pharmacy Majors". Apart from all these projects, she has been repeatedly awarded with a national or a provincial level teaching achievement prize. What notably is the first prize of 2009 National Teaching Achievement Award (rank 2nd) and first prize of 2011 Jiangsu Teaching Achievement Award (rank 1st) .

Xu's research mainly focuses on pharmaceutical education and pharmaceutical policy. Her publications could be seen in Pharmacy Education Quality Assurance in China – Moving Towards a National Accreditation System? , On Trends in China Higher Pharmacy Education Reform and Development and A Comparative Study on Standards and Procedure of Education Assessing between China and America.

CMU-CMU FAIMER REGIONAL INSTITUTE

2014 Fellows Brief Bio-data

Min Cheng

My name is Min Cheng. It is my pleasure to have been selected for FAIMER Institute Fellowship program. I graduated as PhD from Sichuan University, China and then proceed to the Sweden for my post-doctor training in Lund University from 2005 to 2007. My research is about the differentiation of stem or progenitor cells. In November 2011, I came back to China and get the position of vice professor in the Weifang Medical University. I teach the physiology for the undergraduate and the postgraduate medical students. With time, I have gotten some experience in teaching. In December 2013, I became a professor.

Almost at the same time, I started to work as the deputy director of the academic affairs' office and responsible for curriculum design, teaching reformation, professional construction and so on. The work in Academic Affairs Office is tough: there is a high tempo, pressure and high expectations. At the beginning, I even want to quit. However I overcame frustrations, and difficulties related to unfamiliar job. Actually, I start to like the duties and responsibilities of this job.

I am a positive, patient, hardworking and dedicated person. I hope that I can get more knowledge and skills about medical education, expand the international perspective, improve the education and scientific research and share the ideas with other people at FAIMER. I am looking forward to starting the life in the family of FAIMER.

Zhenggang Bai

Dr. Bai was born in one countryside of Gansu Province, China. He received high education including Bachelor, Master, and PhD degree from Sep 2001 to Jun 2011 in Lanzhou University, one of Central University in China. In 2011, He got the joint PhD degree of Lanzhou University and University of Southern California.

Since October, 2011, he has been working in Key Laboratory of Evidence Based Medicine and Knowledge Translation of Gansu Province; Chinese GRADE Center. An expertise in Evidence-Based Medicine, elderly health and evidence translation, skills in systematic review and meta-analysis. He gave graduate and undergraduates class of Evidence-Based Medicine and Systematic Review.

Dr. Bai has participated in more than 50 studies and published about 10 articles on such topics as infection diseases treatment, older adults' mental health improvement. He has also involved in two cross-national collaborative research projects. Now, he as Principal Investigator conducted one National Natural Science Foundation of China, one Provincial Research Subject, two Fundamental Research Funds for the Central Universities. Recently, Dr. Bai as the major beginner set the Clearinghouse of Aging Health of Chinese with the School of Social Work, University of Southern California, USA. (www.chinaaginghealth.com/).

I am looking forward to join the FAIMER family and share my thoughts and ideas with everyone there.

2014 Fellows Brief Bio-data

Yuhang Liao

My name is Yuhang Liao, born on August 20th, 1984 in Hunan Province of China. I am married since 2010, and have a 2 years old lovely girl. I got my bachelor degree of chemistry from Xiangtan University in 2006, which locates in the hometown of Comrade Zedong MAO. Then I continued to purchase a further education in Zhongnan University of Economics and Law, and got a master degree majored in Public Economics in 2008. I've always been a diligent student.

After graduation in 2008, I came to work in School of Management, Hainan Medical University as a lecturer; the campus locates in the tropical island of Hainan Province. My main research field is Health economics and my current research interests include health economics and medical care expenditure control. Except teaching in School of Management, I have been also attached to the Teaching Affairs Department of Hainan Medical University since 2010 where I am responsible for the management of teaching material construction.

As a lecturer, I have taught several courses for the students of clinical medicine, such as Health Economics, Social Medicine, and Social Investigation Methods. As a researcher, I am working together with other team members on a research project about medical expenses, which is funded by Hainan Provincial Federation of Social Science. As a member of the Teaching Affairs Department of Hainan Medical University, I've always paid attention to the direction of the medical education reform and have attended some conferences and training programs on reform of medical education.

Thanks to FAIMER for giving the opportunity of attending the training program to me. From this study, I hope I can get a further expanded vision of international perspectives and learned more abilities to improve education management and to conduct scientific researches in the future.

Yufang Zeng

I am Yufang Zeng, thirty-six years old, from Quanzhou City, Fujian Province, the hometown of Overseas Chinese in southeast coastal China. I graduated in Clinical Medicine from Fujian Medical University and had received a Bachelor Degree of Medicine.

Working at the office of academic affairs of Fujian Medical University since 2002, I have been responsible for the school's construction and management of clinical teaching process and clinical teaching bases. I also take charge of some medical education research projects. One of them won the first prize in Teaching Achievement Award of Fujian Province.

After completed my postgraduate course on public management, I am applying for a Master's degree these days. Besides, I am engaging in a school teaching reform project: Study on the Evaluation Index System of the Teaching Quality in Clinical Teaching Bases.

I am looking forward to joining the big family of FAIMER, sharing the experience in medical education with other fellowships. I believe it will bring great benefits to my study and work in the future

CMU-CMU FAIMER REGIONAL INSTITUTE

2014 Fellows Brief Bio-data

Yalv Gu

I am Gu Yalv and was born on May 27, 1976. In 2000, I graduated from Kunming medical college and got a master's degree in medical imaging in July 2003. I was teaching secretary for the Second Affiliated Hospital of Kunming medical university from 2004 to July 2012.
